JOURNAL OF ELECTROANALYTICAL CHEMISTRY AND INTERFACIAL ELECTROCHEMISTRY, VOLUME 239 (1988)

SUBJECT INDEX

Acetic acid,
single crystal radio-electrochemistry: Adsorption of ——— on well-defined Pt (111) surfaces (Rice et al.) 413
Acetonitrile,
interfacial energetics of electrodeposited cadmium selenide in ——— (Szabo, Cocivera) 307
Poly(pyrrole-manganese tetraphenyl porphyrin) film electrodes in ——— solution (Bedioui et al.) 433
Activated charcoal suspension,
direct and alternating current voltammetry at an HMDE in solutions containing ——— (Świątkowski et al.) 91
Active sites,
nucleation on ———. Part IV. Invention of an electronic method of counting the number of crystals as a function of time; and the discovery of nucleation rate dispersion (Deutscher, Fletcher) 17
Aldehyde,
electrodimerization of crotonic ——— in aqueous media on a mercury electrode (González-Arjona et al.) 239
Alkanes,
adsorption of ——— on a bismuth electrode from an alcoholic medium (Palm et al.) 333
Aminocarb,
investigations of the oxidation of the carbamate pesticide ——— (Gordon von Nehring, Andersson) 187
5-Amino-1,10-phenanthroline,
electrochemical behavior of ——— and oxidative electropolymerization of tris[5-amino-1,10-phenanthroline]iron(II) (Nyasulu, Mottola) 175
Aniline,
cyclic potential sweep electropolymerization of ———. The role of anions in the polymerization mechanism (Zotti et al.) 387
Bandgap,
on the accessibility of the ——— on semiconductor interfaces by non-equilibrium Fermi energies of electrons and holes (Lorenz, Sourisseau) 9
Bismuth,
adsorption of alkanes on a ——— electrode from an alcoholic medium (Palm et al.) 333
Cadmium selenide,
interfacial energetics of electrodeposited ——— in acetonitrile (Szabo, Cocivera) 307
Carbamate,
investigations of the oxidation of the ——— pesticide Aminocarb (Gordon von Nehring, Andersson) 187
Carbon monoxide,
vibrational spectroscopy on platinum single-crystal electrodes. Part I. In-situ infrared spectroscopic studies of the adsorption and oxidation of ——— on Pt (111) in sulphuric acid (Furuya et al.) 347
Charcoal,
direct and alternating current voltammetry at an HMDE in solutions containing activated ——— suspension (Świątkowski et al.) 91
Copper,
Determination of cystine and cysteine in seawater using cathodic stripping voltammetry in the presence of Cu(II) (Van den Berg et al.) 137
Intermetallic compound phase formation in Pd + ——— alloy powders (Mallát, Petró) 409
Crotonic aldehyde,
electrodimerization of ——— in aqueous media on a mercury electrode (González-Arjona et al.) 239
Crystallographic orientation,
changes in real surface area, ——— and morphology of platinum electrodes caused by

periodic potential treatments: Phenomenological approach (Visintin et al.) 67
Cyst(e)ine,
determination of ——— in seawater using cathodic stripping voltammetry in the presence of Cu(II) (Van den Berg et al.) 137
Cytochrome *c*,
the effects of temperature and electrolyte at acidic and alkaline pH on the electron transfer reactions of ——— at In_2O_3 electrodes (Koller, Hawkridge) 291

Deazapurine nucleotide,
electrochemical and photochemical oxidation of the ——— drug tubercidin-5′-monophosphate (Childers-Peterson, Brajter-Toth) 161
Dioxygen,
study of the electroreduction of ——— on thin films of platinum phthalocyanine in alkaline solutions. Part I. Electrochemical investigations (Paliteiro et al.) 273
Dipole systems,
determination of the potential due to a surface distribution of ——— with several imaging planes. Application to organic adsorption (Schuhmann) 447

Ethylene,
spectroscopic investigation of electrochemically active compounds. SERS of nitrobenzene, sulfide, ——— and hydroquinone on Au (Baltruschat et al.) 361
Substituent effects on electrochemical reduction of viologen dimer and trimer with ——— spacer (Imabayashi et al.) 397

Flow phenomena,
——— in FIA and flow electrolysis (Sioda, Curran) 1

Glassy carbon,
electrochemistry of quinizarine adsorbed on a ——— electrode in aqueous solutions (Zinger) 209
Gold,
spectroscopic investigation of electrochemically active compounds. SERS of nitrobenzene, sulfide, ethylene and hydroquinone on ——— (Baltruschat et al.) 361
Underpotential metal deposition on ———, monitored in situ with a quartz microbalance (Deakin, Melroy) 321

Hydroquinone,
influence of orientation on the electrocatalytic hydrogenation of ——— chemisorbed at smooth polycrystalline platinum electrodes (Mebrahtu et al.) 375
Spectroscopic investigation of electrochemically active compounds. SERS of nitrobenzene, sulfide, ethylene and ——— on Au (Baltruschat et al.) 361

"Indifferent" electrolytes,
the oxide/solution interface: specific effects of ——— (Ardizzone) 419
Indium oxide,
the effects of temperature and electrolyte at acidic and alkaline pH on the electron transfer reactions of cytochrome *c* at ——— electrodes (Koller, Hawkridge) 291
Iodide,
rotating-disk electrode studies of the anodic oxidation of ——— in concentrated iodine + iodide solutions (Xiaoyuan Liao et al.) 149
Iridium,
analysis of a quasi-reversible two-electron cyclic voltammetric wave for an organometallic Ir(III)/Ir(I) couple at platinum and mercury electrodes (Bowyer, Geiger) 253
An ——— based mercury film electrode. Part II. Comparison of mercury-film electrode behaviors: Theory versus reality (Kounaves, Buffle) 113

Large crystal grains,
a method of obtaining a small number of nucleation sites and growing ——— (Adžić et al.) 107

Mercury,
behaviour of the ——— ultramicroelectrode (Pons et al.) 427
Mercury film electrode,
an iridium based ———. Part II. Comparison of mercury-film electrode behaviors: Theory versus reality (Kounaves, Buffle) 113
Metal/inner layer capacity,
a semiempirical approach to the ——— in the absence of specific adsorption (Molina et al.) 405
N-Methyl-*N*′-hexadecyl viologen,
comparative electrochemical studies of ——— monomolecular films formed by irreversible

adsorption and the Langmuir–Blodgett method (Lee, Bard) 441
Molten NaCl + KCl + K_2TiF_6,
chronopotentiometric study of titanium in ——— (Sequeira) 203
Morpholines,
cyclic voltammetric studies on nitrosubstituted *N*(thioacyl)piperidines and ——— (Ciureanu et al.) 227

Nitrobenzene,
spectroscopic investigation of electrochemically active compounds. SERS of ———, sulfide, ethylene and hydroquinone on Au (Baltruschat et al.) 361
Nucleation,
a method of obtaining a small number of ——— sites and growing large crystal grains (Adžić et al.) 107
——— on active sites. Part IV. Invention of an electronic method of counting the number of crystals as a function of time; and the discovery of nucleation rate dispersion (Deutscher, Fletcher) 17

Organic adsorption,
determination of the potential due to a surface distribution of dipole systems with several imaging planes. Application to ——— (Schuhmann) 447
Organometallic Ir(III)/Ir(I) couple,
analysis of a quasi-reversible two-electron cyclic voltammetric wave for an ——— at platinum and mercury electrodes (Bowyer, Geiger) 253
Oxide/solution interface,
the ———: Specific effects of "indifferent" electrolytes (Ardizzone) 419

Palladium,
intermetallic compound phase formation in ——— + Cu alloy powders (Mallát, Petró) 409
Periodic potential treatments,
changes in real surface area, crystallographic orientation and morphology of platinum electrodes caused by ———: Phenomenological approach (Visintin et al.) 67
Pesticide,
investigations of the oxidation of the carbamate ——— Aminocarb (Gordon von Nehring, Andersson) 187
Platinum,
changes in real surface area, crystallographic orientation and morphology of ——— electrodes caused by periodic potential treatments: Phenomenological approach (Visintin et al.) 67
Influence of orientation on the electrocatalytic hydrogenation of hydroquinone chemisorbed at smooth polycrystalline ——— electrodes (Mebrahtu et al.) 375
Single crystal radio-electrochemistry: Adsorption of acetic acid on well-defined ——— (111) surfaces (Rice et al.) 413
Vibrational spectroscopy on ——— single-crystal electrodes. Part I. In-situ infrared spectroscopic studies of the adsorption and oxidation of CO on Pt (111) in sulphuric acid (Furuya et al.) 347
Platinum phthalocyanine,
study of the electroreduction of dioxygen on thin films of ——— in alkaline solutions. Part I. Electrochemical investigations (Paliteiro et al.) 273
Polymerization mechanism,
cyclic potential sweep electropolymerization of aniline. The role of anions in the ——— (Zotti et al.) 387
Poly(pyrrole-manganese tetraphenyl porphyrin),
——— film electrodes in acetonitrile solution (Bedioui et al.) 433
Potential-difference infrared spectroscopy,
interpretation of solution electrolyte vibrational bands in ——— (Corrigan, Weaver) 55

Quasi-reversible two-electron cyclic voltammetric wave,
analysis of a ——— for an organometallic Ir(III)/Ir(I) couple at platinum and mercury electrodes (Bowyer, Geiger) 253
Quinizarine,
electrochemistry of ———: adsorbed on a glassy carbon electrode in aqueous solutions (Zinger) 209

Radio-electrochemistry,
single crystal ———; Adsorption of acetic acid on well-defined Pt (111) surfaces (Rice et al.) 413
Rotating-disk electrode,
——— studies of the anodic oxidation of iodide in concentrated iodine + iodide solutions (Xiaoyuan Liao et al.) 149

Seawater,
determination of cystine and cysteine in ——— using cathodic stripping voltammetry in the presence of Cu(II) (Van den Berg et al.) 137
Semiconductor interfaces,
on the accessibility of the bandgap on ——— by non-equilibrium Fermi energies of electrons and holes (Lorenz, Sourisseau) 9
Sulfide,
spectroscopic investigation of electrochemically active compounds. SERS of nitrobenzene, ———, ethylene and hydroquinone on Au (Baltruschat et al.) 361

Tantalum oxide,
electronic current and breakdown characteristics of ——— films (Nigam et al.) 125
N(Thioacyl)piperidines,
cyclic voltammetric studies on nitrosubstituted ——— and morpholines (Ciureanu et al.) 227
Titanium,
chronopotentiometric study of ——— in molten NaCl + KCl + K_2TiF_6 (Sequeira) 203
Tris[5-amino-1,10-phenanthroline]iron(II),
electrochemical behavior of 5-amino-1,10-phenanthroline and oxidative electropolymerization of ——— (Nyasulu, Mottola) 175
Tubercidin-5′-monophosphate,
electrochemical and photochemical oxidation of the deazapurine nucleotide drug ——— (Childers-Peterson, Brajter-Toth) 161

Ultramicroelectrode,
behaviour of the mercury ——— (Pons et al.) 427
Underpotential metal deposition,
——— on gold, monitored in situ with a quartz microbalance (Deakin, Melroy) 321

Vibrational bands,
interpretation of solution electrolyte ——— in potential-difference infrared spectroscopy (Corrigan, Weaver) 55
Viologen,
comparative electrochemical studies of *N*-methyl-*N*′-hexadecyl ——— monomolecular films formed by irreversible adsorption and the Langmuir–Blodgett method (Lee, Bard) 441
Substituent effects on electrochemical reduction of ——— dimer and trimer with ethylene spacer (Imabayashi et al.) 397
